

POR-15 Specialty Items

BEFORE: Rusted, leaking seam.

Squeeze a bead of **POR PATCH™** into seam.

Press and contour bead into seam.

AFTER: Seam is sealed, smooth, permanently free of rust, and ready for a coat of **POR-15®**.

Fill in cracks in most surfaces.

Black & Pearl White Now Available!

POR PATCH™ \$17.99

This is, quite literally, POR-15 in a tube, and like POR-15® it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents.

EPOXY PUTTY (\$29.99 1 pound, \$115.99 6 pound)

It's so strong you can drill and tap it, yet gentle enough that you can apply it with your bare fingers. And since it's WATER BASED, you can simply wet your fingers, and work with it until it is almost perfectly smooth before it dries - eliminating most sanding! But when it cures, it's ROCK HARD, making it perfect for repairing steel, plastics, concrete, etc. Amazingly, it even sticks to damp surfaces, and will cure UNDERWATER, so it can be used to fix leaking basement walls, swimming pools, plumbing fixtures and so much more. Put some EPOXY PUTTY in your toolbox today. You'll find yourself using it all over your shop and home.

Solvent (\$14.99 Quart, \$37.99 Gallon)

Especially formulated for easy cleanup or thinning of POR-15 Rust Preventive Paint.

Warning: The shipping of solvent carries an additional hazmat charge.

Try some today!

Strip Layers of Paint

BEFORE: Old Chevy door coated with several layers of paint.

Just spray **POR-STRIP®** right onto the painted surface.

Almost instantly, **POR-STRIP®** begins to bubble the layers of old paint. Spray more, if needed.

POR-STRIP® (\$17.99 Quart, \$47.99 Gallon)

Paint Remover/Stripper is a clear spray-on remover with the consistency of water. In sample testing, our POR-STRIP® was the choice of professional auto strippers. A special chemical-resistant spray bottle allows you to use less and finish faster than brushing. Remove any coating from any surface without damaging window glass, chrome, or weatherstrip. POR-STRIP® is non acidic and will not harm aluminum or factory fiberglass.

Warning: The shipping of solvent carries an additional hazmat charge.

STRAIGHTLINE BODY FILLER (\$52.99 34oz)

STRAIGHTLINE has over 30% more resin than other fillers, which gives it much greater adhesion. This makes it the perfect choice to apply over POR-15. STRAIGHTLINE has ultra fine particles for perfect feathering of edges, and is manufactured under vacuum, which eliminates those pesky air holes you've experienced with other fillers. It's more

flexible, tougher, and able to tolerate higher temperatures than other fillers (you can even use it in a bake oven!) Use STRAIGHTLINE BODY FILLER for steel, aluminum, galvanized steel, fiberglass, and many plastics.

RestoGRIP Body Filler (\$52.99 34oz)

This body filler is specifically designed for applications that require more strength, such as bridging holes, or filling high-stress areas. RestoGRIP Body Filler is loaded with tiny polyester fibers, which makes it many times stronger than ordinary body fillers. Use RestoGRIP with POR-15, to make permanent repairs to rust holes or deep pits in steel or galvanized steel. Then, use STRAIGHTLINE BODY

FILLER to finish off the repair for the ultimate smooth final finish.
