

POR-15 Topcoats

Blackcoat

BLACKCOTE is a permanent gloss black coating developed for application over painted and unpainted surfaces. Apply over POR-15 Rust Preventive Paint for the toughest, most permanent protection against rust and corrosion ever developed.

BLACKCOTE is non-porous and will not crack, chip, or peel when properly applied according to directions. It has amazing scratch and abrasion resistance and is similar in strength to regular POR-15 Rust Preventive Coatings.

BLACKCOTE is not sensitive to ultra-violet light and may be exposed to sunlight without damaging consequences.

BLACKCOTE has excellent adhesion characteristics and may be applied over POR-15 Rust Preventive Paint months or years later with proper preparation.

Metal Mask

Is it bare metal, or is it **Metal Mask™**? Rejoice, restorers! After years of development, we have finally answered your urgent requests for a super-tough coating that looks just like bare metal. Now you can permanently coat and protect all of those components on your chassis that were left unpainted by the factory when the vehicle was new. Items such as spindles, steering boxes, coil brackets, rear ends, leaf springs, bolt heads, suspension components, master cylinders, coil springs, gas tanks, cast iron transmission housings, and others will look 'factory correct' when coated with **METAL MASK™**. Gone forever are the days when you had to rely on cheapo cans of enamel spray paint that look good for a few months or weeks, but cannot withstand the rigors of the road.

METAL MASK™ is extremely tough, very chip and scratch resistant, and amazingly close to the color of brand-new cast iron or bare steel.

And, **METAL MASK™** is the perfect coating for the high stress bracketry, such as hood hinges, hood springs, hood latch assemblies, etc. It is super tough yet flexible, making it perfect for those areas where enamel paint is sure to flake away.

Whitecoat

Here it is, the toughest, most beautiful white coating you'll ever use. **WHITECOTE** cures to a rock-hard, non-porous finish that won't chip, crack, or peel when applied as directed. It's perfect for wrought iron patio furniture, plumbing fixtures, etc., because it's super-tough, not UV-sensitive, and brilliantly white. Use it to repair a bathtub or sink with chips or rust stains, or to paint and protect an old boat, trailer or RV, or anything that you want to be permanently white.

Hardnose

HARDNOSE™ paints are tough, glossy, two-component coatings for use over primed or painted surfaces. They are moisture cured, so exposure to moisture and humidity will actually improve their performance and strength. When fully cured, **HARDNOSE™** Paints are rock-hard, chemical resistant, non-porous, and incredibly tough. Durable and easily cleaned, they will not crack, chip, peel, or fade with age. **HARDNOSE™** Paints will withstand even the most intensive UV environments. These beautiful, two-component coatings are stronger than any color paints you have ever tried. The long-lasting brilliant colors will look terrific wherever you use them, and will withstand incredible abuse. You'll be amazed and delighted at how well **HARDNOSE™** paints hold up under conditions that would quickly destroy ordinary finishes. **HARDNOSE™** paints are also excellent for industrial applications. Use our safety yellow or orange colors on machinery guards or heavy equipment, and then stand back and marvel at how long they last under abuse. Put **HARDNOSE™** Paints on the chassis of your car, truck, or motorcycle, and quit worrying about stone chips and gravel roads. You'll be amazed at the toughness!

Flexcote

Developed for the marine industry to resist moisture and salt spray, our **FlexCote™** has been found to work incredibly well in construction and industrial applications in any climate. Our new single component topcoat for use over POR-15 Rust Preventive Paint® or other painted and primed surfaces. Our formula is simple: we pack **FlexCote™** with a higher solids content than other paints have and we use less solvent as a carrier. When the solvent evaporates, there's more paint on the job. **FlexCote™** has excellent hiding power and has exceptional long-term gloss and color retention. It is also extremely flexible and resists abrasion and chipping which means long term durability. Available in 16 great colors. **FlexCote™** can be brushed, rolled or sprayed.
