### **Brushes**

FEATURES: Thick, Real Wood Handles Ferrule is nailed, not crimped Bristles set in Vulcanized rubber 100% Natural Bristle holds more paint, spreads smoother!

Bristle and foam brushes in all sizes

### **Daubers (\$24.99 Kit)**

When trying to apply rust-preventive POR-15 into hard-to-reach areas, such as floor pan braces, frame rails, roof channels, rocker panels, fender braces, wheel houses, truck beds, the insides of tail gates, and the braces under the trunk and deck lids. Everyone knows that these areas are exactly where rust often gets started. But how to apply POR-15 there has been a challenge.

Finally we came up with these terrific new exclusive DAUBER KITS, with wool tips on both ends, and light wire bodies that can easily be bent to fit your special needs.

Now you can easily apply POR-15 to the inside of doors and tailgates, without fear of ruining window regulators or other linkage. It's easy to reach those blind areas now, such as the inside of a steel pipe. Try a DAUBER KIT to apply POR-15 to the inside of swing sets, motorcycle frames, farm equipment, or anywhere you can't reach with a regular brush! Kit contains 2 each of 3 different double ended sizes.

### **Spouts (\$1.99 1 Spout)**

Flexible Paint Spouts eliminate messy drips and keep grooves clean for resealing cans. Order enough for all your paint cans.

#### **FEATURES:**

- ▶ Fits Pint, Quart and Gallon cans
- ▶ Easy to Clean - Dry Paint pops off.
- ▶ Use over and over.
- ▶ Made of Flexible Plastic
- ▶ Not affected by paint or solvents
- ▶ It's a Brush Wiper!

### **Tack Clothes (\$4.50 for 6, \$7.50 for 12, \$29.75 for 72)**

Our SUPERTACK dry wiping cloths are terrific for paint jobs, in your car, at your computer, or your electronic gear. An excellent dry tack cloth for use before painting. Picks up dust and lint to ensure a perfect job!

**Spray Gun Filters (\$7.99 1 filter, \$20.99 3 filters, \$183.99 jar of 25)**

Downstream moisture will ruin your spray job. Avoid failure with our direct in-line filter at the gun. Experienced users know that moisture cannot be present when applying POR-15... and even though your spraying system may have moisture traps and filters, condensation may occur in the hose downstream and ruin your paint job.

This great filter will absorb up to one (1) fluid ounce of moisture and insure a perfectly dry system from start to finish every time. It absorbs oil aerosols, condensed moisture, and contaminants as small as 0.01 microns. It attaches directly to the air inlet of your spray gun and, as air passes between the filter's compressed layers, particles and moisture are trapped.

This incredible filtration is accomplished at a true 30 CFM to the spray gun, with minimal pressure drop at the optimum flow rate.
