

# POR-15 Kits

 <p><b>Before</b></p>	<p><b>Before:</b> Acid damaged and rusty battery trays area common problem. Fix the permanently with POR-15.</p>	 <p><b>Step 1</b></p>	<p><b>Step 1:</b> First degrease carefully with water-based Marine Clean</p>	 <p><b>Step 2</b></p>	<p><b>Step 2:</b> Next, neutralize rust and prep with Metal-Ready</p>
 <p><b>Step 3</b></p>	<p><b>Step3:</b> After thorough drying, coat with Por-15, right onto the rust (we used POR-15 silver, for the photography</p>	 <p><b>Step 4</b></p>	<p><b>Step 4:</b> Next, top coat with Chassis Coat Black, or other topcoat of your choice.</p>	 <p><b>After!</b></p>	<p><b>After:</b> Now you have a PERMANENTLY repaired battery tray, that will NOT rust again, even in spite of old leaky batteries.</p>

## Super Starter Kits \$22.99

We created the SUPER STARTER KIT in response to requests from customers anxious to try out the entire 3-step rust-stopping system, as well as those customers who need to cut oily residue on the metal they plan to paint.

You'll get a 4 oz. can of POR-15® (enough to cover 6 square feet with 2 coats), a half-pint of METAL-READY™,

two wooden handle paint brushes, and a pair of our special high-dexterity surgical latex gloves, PLUS an 8-ounce bottle of our famous MARINE CLEAN™, the world's greatest WATER BASED degreaser.

## Caliper Kits \$39.99

### Dress Up Your Calipers!

Nothing ruins the appearance of a sharp set of wheels like dirty, corroded calipers lurking from behind.

Now dress up those steel or aluminum calipers with a super-tough durable finish that will make your car or truck look terrific. Our new caliper paint is beautiful in appearance, and strong enough to withstand the punishment of road debris and temperature extremes. And it looks terrific on any car or truck. Then, whenever your calipers get covered with dirt and brake dust, clean them with anything you like; the POR-15® Caliper Paint™ will stand up to just about anything.

### Kit Contains:

- (1 Qt) Caliper Cleaner
- (8 oz) Caliper Prep
- (4 oz) POR-15 Rust Preventive Paint
- (8 oz) Caliper Paint
- 1 Roll Masking Tape
- 2 Pair Gloves
- 2 Foam Brushes
- Directions to do the job right

Available in five great colors.

BLACK SILVER BLUE RED YELLOW

**Before**

**After!**

**DIRECTIONS:**

**Step 1:** Remove wheels from vehicle. Calipers don't need to be removed. Don't remove brake line.

**Step 2:** Clean surfaces to be painted with **POR-15® CALIPER CLEANER**. Spray on the cleaner and brush out dirt and grime with a small scrub brush and toothbrush. Wear protective gloves and glasses when cleaning your calipers. Read directions on caliper cleaner container before using.

**Step 3:** Wash cleaned caliper thoroughly with water and dry with clean towel. Now spray on **POR-15® CALIPER PREP** and keep surface wet for 10 minutes. Then wash off caliper prep with water and dry thoroughly.

**Step 4:** Mask off the area not to be painted. Tape off brake bleeder screw, brake lines, and caliper piston boots.

**Step 5:** Open the small can of **POR-15® RUST PREVENTIVE PAINT** and stir, making sure the contents are thoroughly mixed. Using a foam brush (included in your kit) paint the caliper evenly, making sure the coating is evenly applied but not to the point where the paint runs. Because this is a rust preventive coating you want to be sure you don't miss any spots which could rust later if not covered.

**Step 6:** When your **POR-15®** coating is just dry to the touch, with slight finger-drag remaining, open your can of **POR-15 CALIPER PAINT**, stir thoroughly, and apply the first coat in thin but even strokes. When the first coat is dry (3 - 4 hours), apply a second coat to achieve a beautiful ceramic-like finish. Congratulations...you should be proud of your work. You've used the finest caliper painting kit in the World and have achieved total rust prevention as well.

## Steering Wheel Repair Kit \$91.99

Here at last, the POR-15® STEERING WHEEL REPAIR KIT will enable anyone to restore a steering wheel to show-quality condition. Our step-by-step instructions were written by leading experts in steering wheel repair. You will find the techniques you learn here useful in restoring other hard-to-repair items as well. Restore dash knobs, gear shift knobs, radio buttons, and other hard rubber, bakelite, or other plastic interior parts. The Steering Wheel Restoration Kit is a must in restoring your old steering wheel to show-quality condition!

**STEP 1:** Spray on **MARINE CLEAN™**, this will remove any dirt, grease, wax or other materials that could interfere with the restoration.

**STEP 2:** Cut out the cracks, cutting clear down to the metal core, allowing **POR EPOXY PUTTY™** to completely fill the cracks and ensure proper adhesion.

**STEP 3:** Moisten your fingers with water and mix the specialized two-part **POR EPOXY PUTTY™**. Knead, tear, mix and squeeze the putty until thoroughly blended.

**STEP 4:** Press the **POR EPOXY PUTTY™** into the cracks, then feather-out the edges. The better it is feathered, the less sanding will be required after it dries.

**STEP 5:** Sand between the finger grips and on contoured surfaces. Begin with the 100 grit for rough sanding, use the 220, and then the 320 grit paper for finish sanding.

**STEP 6:** Slide a threaded rod through the middle of the wheel and secure with washers on each side.

**STEP 7:** Wipe the wheel off with a tack rag, then spray on the primer and let dry.

**STEP 8:** Sand the wheel with the 320 and then the 400 grit wet sand paper. Wipe the wheel down, then spray on the final color.

*"Literally everything you'll need, along with complete instructions, is included. There is enough in this (Steering Wheel Repair) kit to do quite a few repairs, so you might wind up repairing some friends' steering wheels as well."*

Car Craft Magazine

### **Wheel Restoration Kit \$168.99**

Now, for the first time, you can restore your banged-up, scratched, and weathered aluminum wheels to like-new condition with our terrific WHEEL RESTORATION and POLISHING KIT. All you need is your trusty electric drill, and our complete instructions and superior products will guide you through the process. You never have to worry about running out of materials when you buy a RestoMotive Laboratories Kit; we GUARANTEE you'll have enough products to do your entire set of

wheels, and if by chance you do run short of something, just give us a call and we'll send whatever you need to complete your project free of charge!

If you've tried to replace or have your wheels restored professionally, you know how expensive that can be, and if you've looked at other kits from other companies, you know they are far from complete, with important items intentionally left out so you'll have to buy them separately in addition to the price of the kit. RestoMotive Laboratories doesn't play those games! Our kit is complete and fully guaranteed to be complete. All you need is your electric drill and a little time and effort on your part...

#### **Kit Contains:**

- STRIPPER - to remove the remnants of the original wheel clearcoating
- CLEANER - to remove all foreign matter, grease, oil, etc. from wheels.
- POLISHING COMPOUND - 3 large tubes of the best compound made.
- BUFFING WHEELS - 3-4" wheels for compounds, 1-3" wheel for tight spots, 1-6" final buffing wheel for polish, 1 Goblet wheel for contours.
- ARBOR ADAPTORS - for all wheels.
- GLISTEN PC - clearcoat for protection and beauty
- ARTISAN METAL POLISH - for final brilliant gross finish.

# FLOOR ARMOR KIT

**NEW!**

Now, seal your floor permanently, with all-new FLOOR ARMOR™ floor painting kits, from the makers of POR-15®.

No need for acids; no need to flood your floor with water. Just use our easy degreaser on any heavy oil or grease stains, vacuum away any dust or dirt, and paint right over everything with FLOOR ARMOR™. Get the same fantastic results you have come to expect from world-famous POR-15® RUST PREVENTIVE PAINT, with this terrific new product. It is the result of several years of development by our own chemists and product specialists.

Use FLOOR ARMOR™ in heavy traffic areas. It can take the abuse from forklifts, floor jacks, and constant traffic. Once your floor is covered with FLOOR ARMOR™, you'll wipe up oil and grease stains with a rag, and keep dust down too. ## STEP-BY-STEP RESTO

All Products Are Manufactured by

**Before**

Before: Oil and other contaminants have soaked into the concrete.

**Step 1**

Step 1: Mask walls, door openings and any permanent fixtures that do not require coating.

**Step 2**

Step 2: Sweep floor with a stiff-bristled broom or shop vacuum to remove loose debris.

**Step 3**

Step 3: If excessive oil/grease stains exist use the included POR-15® Grease & Oil Remover to prepare the surface.

**Step 4**

Step 4: Mix the POR-15 Floor Armor™ ingredients and apply to floor with the nap rollers with overlapping strokes.

**After!**

After: Now you have a sealed, durable floor surface that is extremely chemical resistant and will last for years to come.
