

# POR-15 Paint & Preparation

## MARINE-CLEAN

Cleans and degreases in one application without leaving residues, noxious fumes or flammable solvents. No other cleaner works as fast or as well. It makes petroleum-based cleaners almost obsolete because MARINE-CLEAN can be diluted with water up to 3, 4, 5 and even 10 times its volume while remaining more potent than other cleaners. MARINE-CLEAN removes grease, oil, mildew, algae, musty odors, soap films, wax. Use it to clean canvas, vinyl, nylon, holding tanks, grease traps, auto parts and more.

## METAL-READY

Provides the best adhesion for POR-15® on any metal surface, including aluminum and shiny polished metal surfaces. Our simple process gently etches metal, creating an ideal anchor pattern for coatings such as POR-15®, while simultaneously leaving a zinc phosphate coating to insure chemical bonding of paint and steel. Avoid other preps that may leave harmful residues which prevent proper adhesion. After thoroughly degreasing your work piece, apply environmentally safe METAL-READY™ to both neutralize any rust and etch any clean bare metal. This will allow better adhesion of POR-15® or any other paint. METAL-READY™ is not caustic, corrosive, toxic or flammable.

## POR-15®

POR-15 is a high-tech, high performance rust-preventive coating designed for application directly on rusted or seasoned metal surfaces. It dries to an incredible rock-hard, non-porous finish that won't chip, crack, or peel, and it prevents rust from recurring by protecting metal from further exposure to moisture. Use it to coat rusty frames, floor pans, farm equipment, marine equipment, or even a heavily corroded battery tray.

4 oz	\$12.99
Pint	\$31.99
Quart	\$39.99
Gallon	\$129.99

**POR PATCH™**

This is, quite literally, POR-15 in a tube, and like POR-15® it dries as hard as a rock, remains flexible, and once dry is totally impervious to fuels and solvents.

Tube	\$17.99

**Power Mesh**

A special fiberglass reinforcing fabric that can be used with POR-15 Rust Preventive paint to bridge gaps and repair holes in sheet metal. Handling Instructions: Do not handle fabric with bare hands. Because it is a special type of fiberglass cloth, the fibers may pierce your skin and you will experience discomfort. Wear a pair of gloves (or other protection) whenever you handle this cloth. As you cut the cloth, some fibers may fly into the air, so be sure to wear the mask provided while cutting. Please note that there is one large piece of cloth in this envelope.
